Mr. Bill Burrows
709 Division St.
Gloucester City, N.J. 08030

March 21, 1988

Dear Mr. Burrows,

I am happy to confirm your reception of WSVA on January 5, 1988 at 0457 EST.

Your log tracks the program well enough for me to determine that you did indeed hear WSVA.

WSVA is a fulltime station operating on 550 kHz with 5 kilowatts non-directional days and 1 kilowatt direction (S.E.) nights. We are using three 1/4 wave towers in an in line configuration for nighttime and a single tower daytime. We are affiliated with AP Radio network and NBC Talknet. WSVA serves the Shenandoah Valley of Western Virginia and the Potomac highlands of West Virginia. Our studio and transmitter are located in Rockingham County, Va. about 2 miles west of Harrisonburg. The format of WSVA could best be described as "full service".

Glad to hear from you as station engineers rarely get DX mail anymore.

Yours very truly,

James D. Seaman
Director of Engineering
Ver Standig Broadcast Group
